Infinity Tunnel

LED lights create the illusion that you're peering into a never-ending infinity tunnel. Control the effects and change the tunnel's colors by changing the mode or pressing the switches.

Use the LCD display panel to turn on or off the tunnel lights, adjust the brightness and speed, or select a new program.

	Turn on/off
	Press to access the program menu.
	Press to activate the speed menu for automated programs. This button may not be visible for programs that are switch activated. In the speed menu, select from speeds 1-10. 1 being the slowest speed.
	Press to alter the brightness. In the brightness menu, select from 10-100%. 10% being the lowest brightness.

Infinity Tunnel Programs

Rainbow	The lights create an automatic color change like a rainbow.	Automated
4 Colors	The lights step in a 4 color sequence - Red, Yellow, Green, Blue.	Automated
Color Chase	The light fades through 4 colors - Red, Yellow, Green, Blue.	Automated
All Color	Press any of the 4 switches and change the color.	Uses Switches
Next Color	Press any of the 4 switches to change to the next color in the sequence.	Uses Switches
Ready Steady Go	Group switch reaction game. First to press their color wins and locks the other users out for 6 seconds.	Uses Switches
Turn Taking	Group switch reaction game. When a switch is pressed, the lights stay on the chosen color until another switch is pressed.	Uses Switches
Roundabout	Press a switch and watch the one pixel of color light go completely around the tunnel.	Uses Switches

Ideas for Use

- Watch the colors light up and change to soothe and calm
- Teach your child the concept of cause and effect as they press the switches to change the colors
- Teach your child colors as they switch from one color to another
