

# Color Changing Light Panel (Moodlight)

Choose the sound responsive mode to control the colors using your voice or by making any sound. The remote control is another fun way to play with the light panel. It encourages eye-tracking and color recognition, and is fantastic for non-verbal users too.

Use the LCD display panel to turn on or off the lights, adjust the brightness and speed, or select a new program.

	Turn on/off
	Press to access the program menu.
	<p>Press to activate the speed menu for automated programs. This button may not be visible for programs that are switch activated.</p> <p>In the speed menu, select from speeds 1-10. 1 being the slowest speed.</p>
	<p>Press to alter the brightness.</p> <p>In the brightness menu, select from 10-100%. 10% being the lowest brightness.</p>

<div style="border: 1px solid black; width: 40px; height: 40px; margin: 10px auto; display: flex; align-items: center; justify-content: center;">Color</div>	<p>Some programs will allow you to choose color options.</p> <p>Select from Green, Lime, Yellow, Orange, Red, Pink, Purple, Indigo, Blue, Sky, Cyan, Aqua and Rainbow.</p>
<div style="border: 1px solid black; width: 40px; height: 40px; margin: 10px auto; display: flex; align-items: center; justify-content: center;">Sensitivity</div>	<p>Some programs require users to make a sound. An internal microphone is used to detect noise.</p> <p>In the sensitivity menu, select from 10-100% sensitivity. 10% being the least sensitive.</p>

## Moodlight Programs

### Automated Programs

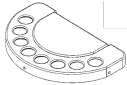

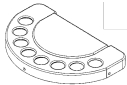

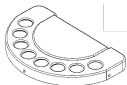

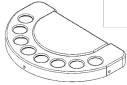

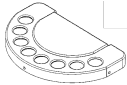

1	<b>Auto All</b>	All four panels change color together. Use the speed and dimmer to adjust.	Automated
2	<b>Auto Step</b>	Each panel changes color using the same color in turn. Use the speed, color, and dimmer to adjust.	Automated
3	<b>Auto Col Step</b>	Each panel changes to a color until all four match. Use the speed and brightness to adjust.	Automated
4	<b>Auto Checker</b>	Pairs of panels change using a different color in turn. Use the speed and brightness to adjust.	Automated

15	<b>Switch Match</b>	The display flashes a color. Press the correct corresponding color on the switch to light up the display. Adjust the speed between color flashes.	Switch Activated 

## Ideas for Use

- Set the panel to a color, then find all the items in the room of the same color
- Use to encourage speech by lighting up the board when a color is called out
- Practice controlling your pace by jumping to a beat and watching the colors light up in response
